1. The remote pairing: please press the  key immediately till you hear the long 'beep' sound.

2. The App pairing: please press the  key immediately till you hear the long 'beep' sound, And then, entre the Wifi_Pair status(Intellectual product).

Notices

1. When the emitter is unable to remotely control the receiver, please check whether the emitter's batteries are in good contact, whether they are fixed properly and whether they run out of use.
2. When the emitter is unable to remotely control the receiver, please check whether there is other remote control products around the space and check whether the keys are pressed down, because same nature of remote control product may cause interference with each other resulting in poor receiving effect. Taking away such articles will normalize the remote control function. (the infrared remote controller is not included).
3. Please use this product under applicable voltage. Too low voltage will lead to failure of the remote controller to work (Please refer to the product label for the voltage range and related parameters).
4. Please take out the batteries if you will not use this product for a long time.

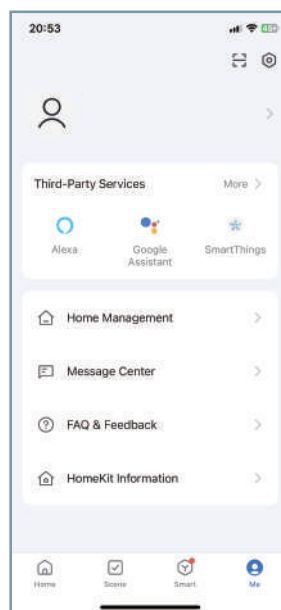

LINK WITH SMART LIFE APP

Once connected to the mains and prior to selecting synchronisation mode, check that the fan works by using the remote control.

1. Download the Smart Life APP- Install - Create account / Login.

2. Create your family and the rooms in your house.

For BT sync

Turn on the Bluetooth, the location and the WiFi of the mobile device with which you are going to make the link. Make sure that the IoT device to which you are going to connect is switched on before clicking on the "+" symbol in the upper right part of the main page of the app (img. 1, img. 2).

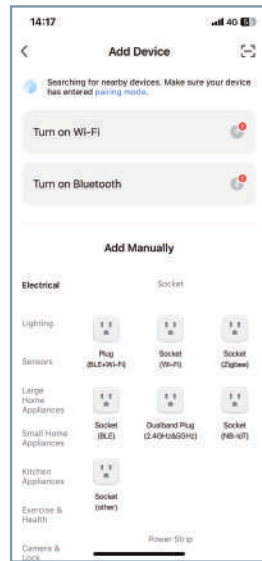

Then, at the top of the page "Add device" the message "Discovering devices" will appear. If the device you want to link appears, press the "Add" button.

If more than one device is detected, click on the "+" button next to the devices you want to add. Once the process is finished, a "✓" will appear next to

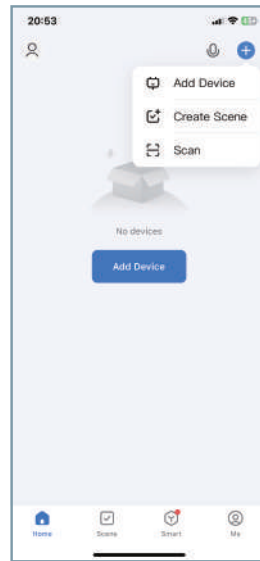

the device name. Click on the “Next” button at the bottom to finish the link.

When finished, you will see a window in which it says “Successfully added” over the icon and the name of the added device. Press “Done” at the bottom to return to the main screen (img. 3, img. 4, img 5).

For EZ Sync

Enter your home's Wi-Fi 2.4Ghz network (5Ghz networks not supported) a progress indicator with a percentage will be shown, when it reaches 100% the device will have been successfully added.

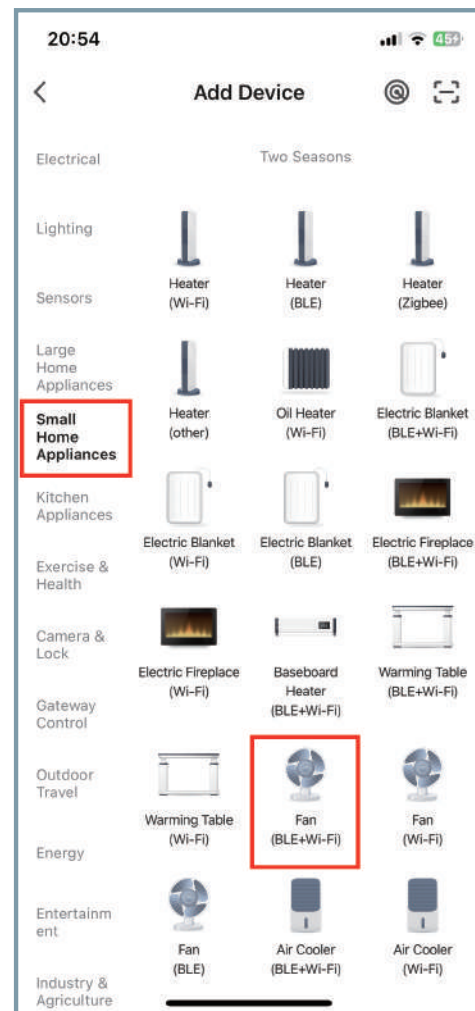

Turn on the equipment and in the first 5 seconds that it is turned on, press and hold the "FAN OFF" button on the remote for 5 seconds.

Select the "Small HomeAppliances" option in the right menu of "ADD Manu-ally", select the "Fan(BLE+WiFi)" fan icon in the options, and then follow the prompts (Img. 6,Img. 7)

SMART LIFE APP

From the Smart Life application, you can access the different controls your fan has available:

1. **Switch:** Turn the fan on or off.
2. **Speed:** Slide the horizontal control to change the fan speed.
3. **Modes:**
 - Custom** - Adjust the speed with the horizontal slider.
 - Sleep** - Keep noise to a minimum so it doesn't bother you while you sleep.
 - Natural** - the fan will change power to give you a feeling of natural breeze.
 - Fresh** – The fan will run at speed less than 1.
4. **Timer:** Schedule fan switch off.
5. **Fan direction:**
 - Forward** - Generates a downdraft to cool you down.
 - Reverse** - it draws in cold air from the ground so that the heat from the ceiling lowers.
6. **Light:** Turn your fan light on or off.
7. **Dimmer:** This command is invalid and the product does not support it.
8. **Cycle Timer:** Automatically turn on or off fans and lights at preset times.
